

Yonghan Yang

Abu Dhabi, UAE | harryyangyh@outlook.com | [Blog](#) | [Scholar](#) | [LinkedIn](#) | [GitHub](#)

Objective

I'm an **aspiring AI researcher**, focused on Score-Based Generative Models, Agentic AI and Foundation Models. I'm also interested in interdisciplinary fields: AIDD in biology, causal inference in finance and . I sketch, play tennis, enjoy literature, run regularly and volunteered across venues. My motto is *To become a Hero the Hard Way*.

Skills: *Coding* in Python, Rust, TypeScript. *Writing* via Markdown, Typst, $\LaTeX$. *Lab* with SnapGene, Benchling, AutoDock Vina. *Visuals* with Manim, PowerPoint, Photoshop.

Education

MBZUAI, (Abu Dhabi, UAE), GPA - 3.8/4 Aug. 2025 – Present

- Bachelor of Science (B.Sc.) in Artificial Intelligence, expected May 2029
- Courses: **ML7501 Applied ML**, GE1510 Physics & Life Science, BUS1010 Economics, UG0500 Advanced Math
- Honors: Dean's List (10%), *Sheikh Tahnoon bin Zayed Scholarship*, Pioneer Scholarship

Experience

Cyber-Physical Intelligence Lab & AAAAA Community, *Researcher* Oct. 2025 – Present

AI labs across MBZUAI, McGill & Mila. Directly mentored by lab founder [Prof. Steve Liu](#) and senior member [Ye Yuan](#).

- **Diffusion Surrogate for Offline Optimization** (*co-first author*): experimented conditional diffusion models as surrogates for offline optimization. Accepted by 2026 **ICML** (presented in Seoul) and **ICLR DeLTa workshop**.
- **Surrogate-Guided Memory Retrieval for Agents** (*co-first author*): proposed and benchmarked surrogate-guided offline training of agent memory retrieval. Submitted to 2026 **NeurIPS BiAlign workshop**.
- **Agentic Social Deduction**: audited grounding of agents' claims in social deduction games. Accepted by 2026 **EMNLP**.
- **Discrete Diffusion Survey**: investigated AI4S application for diffusion model survey. Under review at **TMLR**.
- **Finance Agentic Benchmark**: tested agents on representative financial intelligence workflows. Accepted by 2027 **ACL**.

Precision-medicine AI Lab, *Researcher* Mar. 2026 – May 2026

AI4S lab across MBZUAI & **Harvard Medical School**. Directly mentored by lab founder [Prof. Jun Wen](#).

- **Semi-supervised High-order Relation Learning**: trained MHA-based model on drug combination-disease data.

Paper Reviewer Feb. 2026 – Present

Reviewed for top ML venues like 2027 **ICLR** and 2026 **ICLR FM4Science workshop**.

GenBio AI, *Research Engineer Intern* Mar. 2026 – Present

AI4S startup co-founded by world-renowned scientists like [Prof. David Baker](#). Supervised by CTO [Prof. Le Song](#).

- **BioXArena**: designed multi-modal biomedical ML agent tasks & benchmarked agents. Accepted by 2026 **NeurIPS**.
- **VCHarness**: optimized MCTS-based harness efficiency and benchmarked on BioXArena.

Shanghai Academy of AI for Science, *Research Engineer Intern* May 2026 – Present

AI4S R&D institute focused on industrial applications. Engineered A2A protocol and researched generative models.

- **Decentralized Agentic Reasoning**: optimized decentralized swarm based on established A2A protocol.

Activities

Math Modeling Competitions, **COMAP** & **MAA** & **AMS** Jan. 2025 – Present

- 2025 IMMC Outstanding (*Greater China*, < 1%) & Meritorious (*International*, < 10%).

Synthetic Biology, **iGEM Competition** & **Team Wiki** Oct. 2022 – Present

- Contributed to team BNDS-China as *instructor*, *student leader* and member. Won **top 10** teams (10%), gold medal, Best Measurement, Best Part Collection, etc. since 2023.
